

Milestone Reached

Our Inaugural ZHRO tour with our Demo Trailer showcasing a CAT C-15 Diesel Engine running with ZHRO technology on 100% Natural Gas. The ZHRO driver will be accompanied by Bob Reifsnider Director of Business Development, and two ZHRO Support Staff.

The tour has been designed to introduce our technology to potential Truck Dealers in Western Canada who may be interested in being one of our Sales and Install Partners. We have had a number of Truck Dealers (Freightliner and Peterbilt) from Western Canada and Eastern Canada come down to Phoenix Arizona, to tour the facilities and view our Technology, showing great interest to move to the next step, contracting to become an Install Partner.

The Demo Trailer is scheduled to cross the border into Canada March 9th, and the first showing is Monday, with much anticipation and excitement, we are showcasing the technology to numerous potential install dealers in the Lower Mainland, and then coming through the Okanagan Valley. We will then head to Edmonton to meet with install dealers.

For our stakeholders we invite you to join us in Summerland & Kelowna, Thursday March 13th 2014. There are many of you who have never personally experienced the ZHRO technology at work, this is an opportunity for you to see the progress made and have answered any questions you might have. Please (RSVP) which location you will be attending.

Date: Thursday March 13th 2014

Time: 10am-12 noon.

Where: Chris Kutschera Residence

5705 Upper Booth Rd N,

Kelowna, BC, V1X 7V7

AGI Company Overview February 2014 Re Cap

The Focus:

- Bring the ZHROTM Fuel Injector System to the truck market

AGI is:

- Privately owned company founded in 2009 by three founding partners
- Corporate Headquarters in Phoenix, AZ
- More than 150 full time Employees – more than 50% that are engineers
- Contracted \$158 Million of revenue to date deployed directly towards commercializing “Green” technologies to address climate change
- ZHROTM company brand established to bring to market first product - Diesel Engine Retrofit Kit

AGI has:

- 300 technologies
- 670 patents granted and pending
- 40 years of Innovation
- Tested – 22 internal test cells
- Validated
- Operated for hundreds of thousands of miles... Injectors, TCR and others.

ZHRO™ Fuel Injector System:

- Overnight conversion
- Noninvasive to engine
- Equal HP/torque to current diesel engine
- Lower maintenance cost/fewer oil changes
- Exceeds Tier 4 standards
- More fuel efficient than diesel engine
- Full warranty

*To all stakeholders, thank you for your continued support.
This is our Year.*

*Sincerely
Chris Kutschera*
